

KARANAM GNANESH CHOWDARY
Course : **B.Tech**, Electrical and Electronics Engineering , 2027
Email : kgnanesh98@gmail.com
Mobile : 7675806215
CGPA : 6.69

ACADEMIC DETAILS

COURSE	INSTITUTE/COLLEGE	BOARD/UNIVERSITY	SCORE	YEAR
CLASS XII	narayana junior college mehdipatnam	Telangana Board of Secondary Education (SSC)	892 MARKS	2023
CLASS X	narayana school kukatpally, medchal district	Telangana Board of Secondary Education (SSC)	10 CGPA	2021

Subjects / Electives	
Technical Proficiency	DSA, Web Development, Python, MultiSim, C Programming, MATLAB

SUMMER INTERNSHIP / WORK EXPERIENCE

PROJECTS

chess website - Web Development Created a chess website where two players can play locally. It shows legal moves, detects checks, and announces the winner when checkmate is done. it can be viewed here chess-website .	Apr 2024 - May 2024
TESLA Club VNIT Website - Web Development Designed and developed the official website for TESLA VNIT, integrating sections like Council, Projects, Achievements, Gallery, and Recruitment. Focused on user-friendly navigation, interactive design, and a consistent background theme across the website.	Oct 2024 - Present
EEE Department Website – VNIT Nagpur - Web Development Developed the News & Notifications section for the EEE department website, featuring an auto-scrolling news slider with an expandable view for detailed updates. Ensured responsive design and smooth user experience.	Jul 2024 - Oct 2024
Nearest Parking slot indicator along with path (NO Arduino) - electronics (logic gates) Designed and implemented a smart parking system that detects vacant parking slots and guides drivers to the nearest available spot using LED indicators without Arduino using logic gates	Apr 2025 - Apr 2025
Foot-Step Power Generator - electrical and mechanical In this group project, we designed and developed a foot-step power generator that efficiently converts mechanical energy into electrical energy. To enhance energy storage and ensure continuous power generation, we integrated a mechanism that maintains rotational motion even a er the user stops stepping. - Tools & technologies used: DC generator, mechanical linkage system, rechargeable battery, voltage regulator, and Multisim software for simulation. - By optimizing the energy transfer system, we improved efficiency and ensured smooth power genera on with minimal energy loss. Our prototype successfully demonstrated its ability to generate and store power, making it a potential solution for small-scale renewable energy applications like charging portable devices.	Mar 2025 - Present
Volume Unit Meter - Electronics Developed an analog VU meter to visually display audio signal levels. Utilized operational amplifiers for signal amplification and rectification, driving a series of LEDs to indicate volume intensity	Apr 2025 - Apr 2025
Mobile charger using rectifiers and step down transformer - electrical and electronics In this Group project we created a mobile charger with output voltage 9-12 v using dc regulation - Tools used: Step down Transformer, Rectifier, Voltage regulator, capacitors, LED . - Optimized DC regulation circuit to minimize voltage ripple and ensure stable output for mobile device charging.	Oct 2024 - Nov 2024

POSITION OF RESPONSIBILITY

Design head - Blitzkrieg(chess club vnit)	Jul 2025 - Present
Technical Secretary - 2 nd year EEE department council i am part of 2nd year electrical department council as technical secretary	Aug 2024 - Jun 2025

EXTRA CURRICULAR ACTIVITIES

Shadow play Part of Shadow play performed in cult-night vnit
intermediate player in badminton and kabaddi
intermediate chess player

VOLUNTEER EXPERIENCE

Vnit's First FIDE Chess Tournament - Role: volunteer Cause: Arts and Culture Part of volunteering team in VNIT's first FIDE chess Tournament	Apr 2025 - Apr 2025
--	----------------------------

Part of volunteering team in VNNI's first FIDE chess tournament

LANGUAGES KNOWN

telugu, hindi, english
